Biographical Note:

Charles Thomas Burton was born 6 October 1912 in Botetourt County, Virginia to Gilmer Brugh Burton and Eula Thomas Burton. He attended Wayside School (Glebe School) and Troutville High School where he graduated in 1930. He served in the US Air Force and was a member of Mt. Union Church.

Burton first became interested in genealogy as a boy when he and his nine brothers and sisters pooled their money and sent off for a genealogical report on their father's family name. Burton's interest in genealogy returned in 1952 after he was diagnosed with tuberculosis. Genealogical research provided an outlet to pass his time. Beginning with his own genealogy, Burton eventually became the foremost genealogical researcher and historian in Botetourt County. As a professional genealogist, Burton conducted research for clients all across the country. He became a fixture in local courthouses and historical societies, who often recommended his services to those seeking genealogical information. In addition, Burton published ten books on Botetourt County, which are included in the Virginia Room collection. Burton's role as a professional genealogist and historian continued for nearly five decades; he retired in 1985. Charles Burton passed away on 17 September 1998.

Scope and Content:

The Charles T. Burton Collection consists of 16 record storage boxes and 1 legal-sized document storage case. The collection is divided into three series:

- Series I consists of surname files arranged alphabetically. The majority contain genealogical information researched for Burton's clients. The files in Series I were working files and often contain the correspondence between Burton and his clients as well as any information and documents he located in his research. In some cases, there is more than one file for a particular surname. In cases where duplicate surname files belong to the same unit, folders were numbered (ex. Agee folder 1 of 2). Some files contain more than one surname and are arranged beginning with the first surname

in Burton's arrangement scheme. Burton also kept separate family group sheets on a number of surnames, which are filed alphabetically after respective surname files.

- Series II consists of files arranged by geographic location. Files in this series may contain historical information on specific places and/or courthouse records from a specific area. The files are arranged as kept by Burton.
- Series III consists of files arranged alphabetically by document type. Files in Series III contain publications, news clippings, photographs, etc. that were not included within Series I or Series II. The files are arranged as kept by Burton.

Much of the information in this collection focuses on people and places in Botetourt County and Southwest Virginia. Burton cited sources and included copies of records with his research. The bulk of Burton's research was compiled from the 1960s through the 1980s. The order in which the collection was kept by Burton has been maintained.
