PUBLICATION

This is **your** yearbook. It is a record of **treasured memories**. It is a priceless keepsake that cannot be replaced. It will last a lifetime if treated with care. Handle it as you would any other new book. **Open** it first down the center and press gently with the palm of your hands. Then begin to open it to other places following the same procedure, until you have opened every page, from cover to cover. This will avoid undue strain on the binding.

**Do not** store your book close to extreme heat, such as a radiator or heat duct. **Do not** leave it lying in the hot sun; it is fresh off the press and must have time to cure thoroughly before it is handled too much. **Avoid** getting it wet. Paper will soak up water.

Any abuse will damage your book. Careful observance of these instructions will help to make your book a lasting record of happy memories. Good luck!
